PRODUCT INFORMATION

Harrell's MAX 18-3-6 with UMAXX® is a general purpose, liquid fertilizer that contains UMAXX, a stabilized form of nitrogen. This product is an excellent choice for a light-frequent feeding program on turf and ornamental plants.

DIRECTIONS FOR USE

18-3-6 with UMAXX may be applied as an undiluted spray or mixed with water where spray equipment requires more volume. Avoid high spray volumes (generally over 25 gallons per acre) where possible because of excessive run-off. Nitrogen rates of 0.1 - 0.8 pounds per 1,000 sq. ft. are suggested depending on the frequency of application, turf traffic, turf species and season. For general conditions apply 0.1 to 0.4 lbs. of N for frequent applications (1 to 2 weeks) or 0.5 to 0.8 lbs. of N for less frequent applications (3 to 4 weeks).
