Stress Reliefe

0-0-25

Harrell's MAX® Stress Reliefe 0-0-25 is a high solubility liquid potassium fertilizer which can be applied directly to the soil, to the plant tissues (with water) or through an irrigation system. This product provides potassium for foliar and root uptake and utilization during critical growth stages. This product can be applied throughout the growing season to correct potassium deficiencies. Fall fertilization provides Potassium, a key element in promoting stress tolerance from adverse environmental conditions.

DIRECTIONS FOR USE

Harrell's MAX® Stress Reliefe 0-0-25 may be tank mixed with most liquid fertilizer and pesticides, however, a jar compatibility test should be performed on prior to application. This product can be used on warm season and cool season grasses. It can be used throughout the growing season as a foliar source of potassium (K) to supplement regular fertilization program. Apply in sufficient water to ensure thorough coverage.

Apply fertilizer in accordance with best management practices established by your State University or Cooperative Extension Service. Observe any State or Local fertilizer regulations pertaining to fertilizer content, application rates, or timing of application specific to your locale.

RECOMMENDED RATES
