# Crop Oil Concentrate

## GENERAL INFORMATION

Crop Oil Concentrate is a blend of a surfactant and a nonphytotoxic agricultural spray oil designed for use with pesticides including desiccants, and defoliants, where an oil concentrate adjuvant is recommended on the pesticide label. Care should be exercised when herbicide sprays containing Crop Oil Concentrate are applied to new varieties or highly inbred lines not previously treated with spray tank adjuvants. If mixture has not been used before, it is recommended that small test areas be treated, before undertaking large-scale application.

## RECOMMENDED RATES

Apply at 3 - 4 pints of Harrell's Crop Oil Concentrate per 100 gallons of spray solution.

## DIRECTIONS FOR USE

Shake or agitate before use. Read and follow the precautions and directions for use on this label and the pesticide it is being applied with.

**MIXING:** Fill spray tank 1/2 full, add the desired amount of herbicide and continue filling. Add Crop Oil Concentrate last. After filling, continue agitation. Always follow pesticide label directions, acceptable practices and advice from your crop consultant.
