Non-ionic
Wetting Agent Pellet

Harrell's, LLC Post Office Box 807 | Lakeland, FL 33802 | (800) 282-8007 | Harrells.com

FOR PROFESSIONAL USE ONLY

DIRECTIONS FOR USE

- Apply with a pellet applicator when hand watering and syringing.
- Pellets typically dissolve within one hour at water pressures of 90 to 120 PSI. The rate at which a pellet dissolves is determined by water quality, temperature, pressure, and flow rates.
- Soak hard-to-wet areas, annual plantings, landscaping plantings, quickly drying mounds, newly sodded areas, and highly compacted areas.

Golf/Turf: Use every time hand watering and/or syringing is required.

General Turf/Landscape Plants: Use every time when hand watering throughout the growing season.

Store in a Cool Dry Place

Net Weight 8 ounces (226.8 g)
